SUMMARY

AI and Data-focused Information Technology student with hands-on experience building end-to-end machine learning pipelines, NLP systems, and intelligent applications. Skilled in Python, scikit-learn, LLMs, and data analysis. Passionate about developing AI-driven solutions that solve real-world problems — from emotion analysis and text classification to agent-based curriculum generation and IoT-integrated safety systems.

EDUCATION

Bachelor of Information Technology.sep 2021-jun 2026
Imam Mohammad Ibn Saud Islamic University

PROFESSIONAL EXPERIENCE

Robotics Trainer – AI Arena Aug 2025 – Sep 2025

- Delivered hands-on training sessions in Arduino programming and electronic circuit design to students.
 - Guided learners through practical projects combining hardware and software integration, improving their problem-solving and technical skills.
 - Mentored students in building real-world prototypes, enhancing their understanding of embedded systems and IoT concepts.
-

COURSES

- Bootcamp for AI Professionals – **SDAIA** (Dec 2025 – Feb 2026)
 - KAUST Artificial Intelligence Specialization – **KAUST Academy** (Nov 2025 – Feb 2026)
 - Data Engineering on google cloud Bootcamp – **Tuwaiq Academy** (Apr 2026 – May 2026)
 - Fundamentals of Artificial Intelligence – **SDAIA** (Aug 2025)
 - AI Risk Management Workshop – **Ministry of Communications and Information Technology** (Sep 2025)
 - Drones Fundamentals Program – **Tuwaiq Academy** (Sep 2025- Oct 2025)
-

TECHNICAL SKILLS

AI & Data: Machine learning, Neural Networks, LLMs, Prompt Engineering, Data Analysis, NLP, Agent-based AI, computer Vision
Programming Languages: Python, JavaScript, PHP, java, HTML, CSS
Frameworks & Tools: Git/GitHub, Firebase, SQL/SQLite, streamlit
Development: Front-end development, back-end development
Hardware & IoT: Arduino, Embedded Systems

PROJECTS

Minhaj - AI-Powered Curriculum Builder *Python, LLMs, Prompt Engineering, Agent-based AI*

- Designed an agent-based AI system that generates complete structured curricula (syllabi, slides, labs, exams) from instructor input
- Engineered role-specific prompts to ensure alignment across planning, content generation, and assessment agents
- Evaluated outputs using curriculum completeness, alignment, and consistency metrics

WadiText- NLP Tool *.python . streamlit . scikit-learn. NLP*

- Built an end-to-end NLP web application with a Streamlit interface and CLI, supporting Arabic and English text
- Implemented lexicon-based emotion analysis (happy / sad / neutral) with negation handling and intensity boosting
- Trained and compared 5 classifiers (Logistic Regression, Random Forest, SVM, Naive Bayes, KNN) with TF-IDF vectorization
- Built EDA, preprocessing, and training pipelines with interactive charts including word clouds, confusion matrices, and model comparisons

Graduation Project – Smart Emergency Necklace System(SEEN) *.IoT. Embedded Systems. Cloud*

- Developed an IoT wearable safety device with real-time GPS tracking and emergency alerts
- Enabled multimedia evidence capture (audio, images) and integrated secure cloud storage for accessibility
- Built with embedded systems for reliability in safety-critical situations

Smartie- Smart campus Service Mobile Application *.java. SQLite. android*

- Designed and built an Android app supporting daily university student needs through integrated campus services
- Implemented local data storage with SQLite enabling offline access and efficient data retrieval

FindCourses - course Search Platform *.HTML.CSS.JavaScript.PHP.SQL*

- Developed a database-driven web app for searching and enrolling in courses with user-friendly interface
